

DUAL QUALIFICATION

MANUFACTURING AND ENGINEERING TECHNOLOGY

FUTURE FORWARD FACING INNOVATIONS

Receive the skills to have an exciting career in the ever growing Manufacturing and Engineering Technology industries.

Advanced manufacturing and engineering technologies form the basis of future innovation in industry. Workforce skills in these areas are key to increasing efficiency, productivity and competitiveness of modern manufacturing. Our dual qualification program provides the skills and knowledge required to implement innovative technologies within industry operating in both global and local contexts.

17% Employment growth in the sector

97% Employment rate in the sector

STUDY PATHWAYS

Use your dual qualification to progress into a:

- 🏠 Certificate IV
- 🏠 Diploma
- 🏠 University Degree

CAREER OPPORTUNITIES

- 🏠 Electrical/Mechanical Engineer
- 🏠 Engineering Design
- 🏠 Systems Engineer
- 🏠 Drone Systems Designer
- 🏠 Automation Technician

DURATION: 1 day a week over 20 weeks, (1 Semester)

COURSE LEVEL	PROGRAM FOCUS	OUTCOMES
 MSM20216 Certificate II Manufacturing Technology	Technical - Practical skills and knowledge to carry out technical support functions in mechanical engineering research, design, manufacture operations, and maintenance. You will learn skills in: <ul style="list-style-type: none">• Work safely in a manufacturing environment• Operating equipment• Monitoring processes• Finding faults in a manufacturing system	<ul style="list-style-type: none">• 4 credit points towards QCE
 MEM30505 Certificate III Engineering - Technical	Design - Practical skills and knowledge to carry out technical support functions in mechanical engineering research, design, manufacture operations, and maintenance. You will learn skills in: <ul style="list-style-type: none">• Computer aided drafting• Mechanical design• Business innovation• Computing• Quality controls• Working with engineering materials• Materials testing	<ul style="list-style-type: none">• 5 credit points towards QCE• 68 ranking points towards QTAC

This innovative program is **fully funded** under VETiS funding by the QLD government's VET Investment Budget.
